

SOLUTION

Modern Slavery Questionnaire

Effectively identify, mitigate and report on Modern Slavery Risks in your supply chain with Ethixbase360 and Norton Rose Fulbright's Modern Slavery Risk Assessment Solution

According to recent estimates there are over 50million people in slavery or forced labor globally at any time. This number is sadly growing. To address this issue governments across the world are in the process of adopting and/or strengthening Modern Slavery reporting requirements which mandate organizations report publicly on the steps they are taking to combat issues of slavery and trafficking in their supply chains.

To help organizations to meet requirements and have a positive impact Ethixbase360 has collaborated with global law firm Norton Rose Fulbright to design a market leading solution to engage directly with third parties available via the Ethixbase360 Third Party Risk Management platform.

ENGAGE DIRECTLY WITH A PURPOSE BUILT AND EASY TO USE PLATFORM

The Ethixbase360 Modern Slavery solution is designed to assist our clients and their suppliers to elevate sustainability, ensure resilience and deliver a positive impact within the supply chain. All while managing areas of reputational, and increasingly legal, risk.

Our solution allows your business to:

ENGAGE DIRECTLY with third parties with a pragmatic and easy to complete questionnaire resulting in market leading response rates

ASSESS AND REPORT on the effectiveness of actions taken to manage supplier risk year-on-year. Visualize patterns in high-risk suppliers and configure dashboards and notifications

BENEFIT FROM a robust risk scoring methodology designed and periodically updated by global top 10 law firm Norton Rose Fulbright

APPLY A CONSISTENT and shared standard of Human Rights Due Diligence drawing upon data from the Global Slavery Index, World Bank Governance, International Work Group for Indigenous Affairs and US Department of Labor

UNDERSTAND SPECIFIC RISK areas at the third party and supply chain level allowing you to visualize risk and gain actionable insights to mitigate risk and improve standards

SCALE as your business needs with access to an end-to-end third-party risk management platform that can be configured to your changing needs
